

nhxsPricer Price a Claim

Claims are created using a web form based on an enhanced CMS 1500 claim form. Required fields are highlighted to speed data entry. In order to help protect against key stroke errors that could affect the pricing of the claim, the procedure, modifier, and diagnosis code(s) are validated. If any of these are invalid for the date of service, an alert will be returned when you attempt to price the claim.

REQUIRED FIELDS ARE HIGHLIGHTED IN YELLOW
